A WORD FROM OUR GENERAL MANAGER:

Why More Families Are Choosing Factory-Built Homes in 2026

Factory-built homes continue to gain popularity as families look for affordable, efficient, and high-quality housing options. Built in a controlled environment, these homes benefit from consistent craftsmanship, reduced weather delays, and a more predictable construction timeline.

Today's factory-built homes also offer a wide range of customizable floor plans, modern features, and energy-efficient designs that help homeowners save on utility costs. With strong construction standards and excellent value, factory-built homes provide an attractive path to homeownership for many families.

As the housing market evolves, more buyers are discovering that factory-built homes offer the perfect combination of quality, convenience, and affordability.

FACTORY BUILT MEANS BUILT TOUGH

Below is a site built home being exposed to the outdoor elements. Compromising the home before it's even finished:

Factory built homes are built indoors to protect your investment from the harsh elements:

Stop by our locations to find a home that's built tough!

MYTH-BUSTING: MODULAR & MANUFACTURED HOMES

MYTH "Manufactured and modular homes always depreciate."

FACT Many manufactured homes appreciate, especially when placed on owned land. Recent data shows they can even outpace traditional single family homes in value growth.

MYTH "They all look the same."

FACT Modern modular and manufactured homes offer customizable layouts, stylish finishes, open concept designs and curb appeal that rivals site built homes. Many are indistinguishable from traditional houses.

MYTH "They're only for lower income buyers."

FACT These homes appeal to a wide range of buyers from first time homeowners to retirees to families seeking efficient, customizable, high quality housing at a smart price point
